

Emergency Response Systems

Gallagher Bassett is pleased to announce the addition of **Aires Consulting** to the Risk Control Consulting Services (RCCS) division. Aires Consulting is a full service Environmental, Health and Safety provider that offers a diverse set of disciplines, including Designed Emergency Response Systems.

Whatever your emergency: Asbestos Containing Materials; Hazardous Waste Spills; Confined Space Emergency; Industrial Hygiene; Safety Issues; Environmental Impacts, etc., Aires will be there for you! Our designed response systems are an integrated approach to emergencies within your facility.

The Aires system combines the best elements of “traditional” **reactive** response mechanisms with **independent** engineering and scientific evaluations to reduce long and short term costs, and most importantly, get you safely back into your facility **fast**.

This is a cost-effective system enhancement to the traditional restoration contractor, first responder approach. We do not compete with the well-qualified contractors, we make them BETTER.

Assistance Available 24 Hours per Day, 365 Days per Year
